# NTDeliver Country Pages

27 June 2018

NTDeliver centralizes and coordinates information from a variety of sources to better monitor and evaluate the NTD supply chain.

### **Reduce Fragmentation**

Centralize data that is currently spread across organizations in numerous spreadsheets, emails and databases.

### **Increase Measurement**

Use KPIs to identify why purchase orders were running late, arming you with the information you need to diagnose problems and implement solutions.

### **Improve Collaboration**

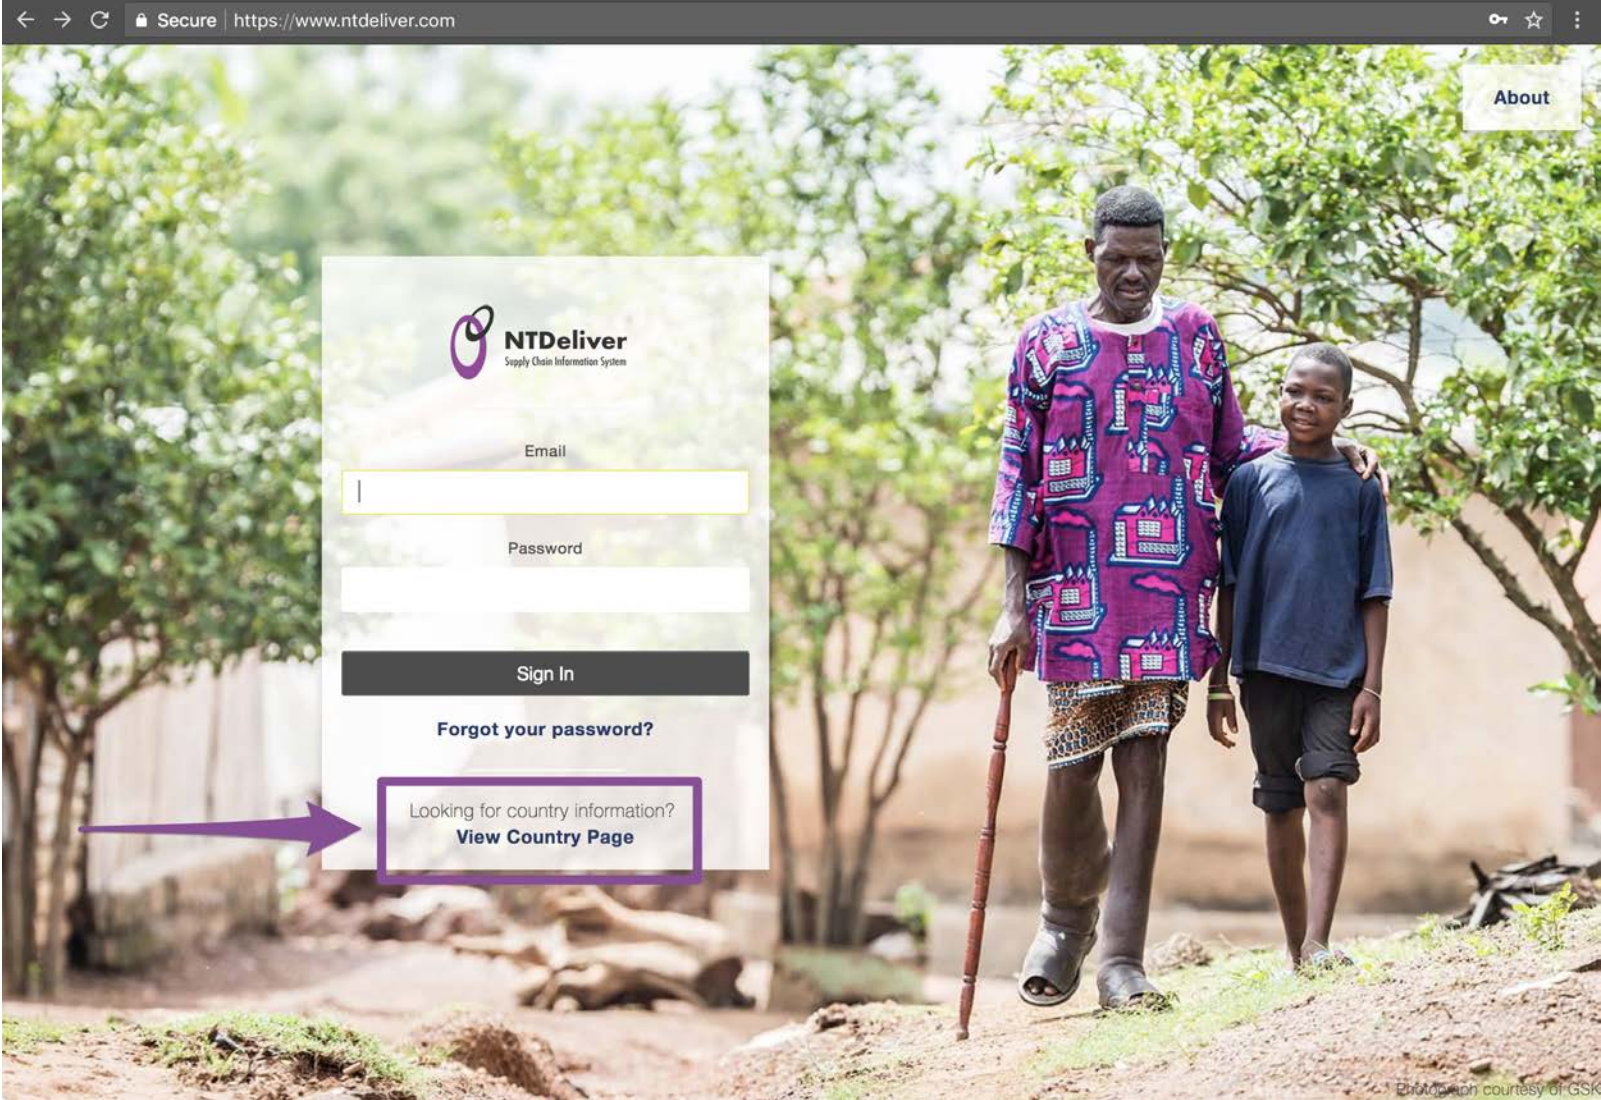

Allows WHO, medicine donors, shipping partners and local key stakeholders like MoH and implementing partners to work collaboratively in a single system.

### **Simplify Reporting**

Automatically generate common reports that previously took a lot of time, such as Monitoring Tables or Application Statuses.
